### KEY:

- **SEPARATE**: Dangerous goods of these two classes are likely to interact with each other in such a way as to significantly increase risk and should not be kept in the same area unless it can be demonstrated that the risks can be fully controlled. Consult MSDS for further guidance.

- **SEGREGATE**: Dedicated stores or storage cabinets are recommended. Adequate separation from other buildings and boundaries is required. Consult MSDS for further guidance.

- **ISOLATE**: Segregation of these two classes may be necessary. Refer to the MSDS for further guidance. All Class 9 dangerous goods should be segregated in accordance with the MSDS.

- **REFER TO MSDS**: Segregation of these two classes may be necessary. Refer to the MSDS for further guidance. All Class 9 dangerous goods should be segregated in accordance with the MSDS.

- **OK**: Dangerous goods of the same class have similar primary hazards and are usually considered compatible. Consult with the MSDS or supplier about requirements for individual substances.
